

**Welcome to Multi-Task Industrial Ltd.** We are a group of highly skilled individuals with unsurpassed expertise in the industrial sector. With a wide range of services and the right people for nearly every task, we are confident we can handle all your maintenance needs.

## Leak Sealing:

**Multi-Task's** Leak Sealing Service is a 24 – 7 emergency service that provides a solution where a leak cannot be isolated or is creating a hazard that could result in an unscheduled plant outage or shutdown. **Multi-Task** Leak Sealing Service can eliminate leaks on just about any type of piping configuration or component.

**Multi-Task's** Leak Repair Designs (pressure containment devices, PCDs) are P.Eng. stamped and submitted with all relevant paperwork to the jurisdictional boiler pressure safety authority for registration or CRN.

**Multi-Task's** range of products and services allow us to perform leak sealing jobs on a wide variety of processes at pressures up to 3000 PSI and temperatures ranging from cryogenic to 900c.

**Multi-Task's** Leak Sealing Service is the ideal choice for petrochemical and chemical plants, power plants, steel mills, cellulose and paper mills, waste treatment plants, as well as any other industries processing steam.

## Bolting & Tensioning:

**Multi-Task's** Bolting & Tensioning division has selected the best equipment available allowing our technicians the ability to adapt to any situation and complete the job right the first time.

**Multi-Task's** Bolting & Tensioning division can offer:

- Gap analysis
- Development of Procedures
- Engineering Support
- Flange Management Program
- Joint Integrity Infield Inspectors
- Craft Execution and Equipment
- Bolt Load Validation

## Labour Services:

**Multi-Task Industrial Ltd.** prides itself in having a skilled labour force that is dedicated to the highest level of safety possible while maintaining an unsurpassed quality of workmanship within tight timelines. Our team can provide:

- Manual decoking and chipping services
- Manwatch
- Sparkwatch
- General Ground Services
- General Tower Services
- Confined Space Entry
- Gas Monitoring
- Mobile Equipment Operators
- Class 1 Drivers
- Other services as required

## Robotic Demolition:

**Multi-Task Industrial Ltd.** utilizes the **Brokk Robot** to provide high speed, high quality demolition while maintaining today's stringent requirements for employee safety and environmental friendliness. The features that most distinguish a Brokk from other types of contract machines and hand-held equipment are as follows:

- Brokk is always remote controlled
- Extremely small outer dimensions and low weight give Brokk tremendous power efficiency
- Brokk is powered by electricity
- Many tools increase the ability to carry out tasks of a varying nature.

**Multi-Task's** highly skilled operators and the Brokk robot are an excellent choice for:

- Debricking cement and lime kilns
- Interior demolition
- Stripping furnaces
- Plaster, brick and tile demolition
- Steel and metal works
- Breaking foundations

## Non-Destructive Testing & Inspection Services:

**Multi-Task Industrial Ltd.** has a variety of inspection options for your plant. Our Gyroscopic inspection systems that can capture inspection video from inside pipes, ducts and chimneys. Our fully integrated digital inspection systems provide results recorded to an MP4 recorder or through a video out terminal to an external device. Once blockages are detected, **Multi-Task's** robotic fishing tool used in conjunction with the video can remove many blockages saving valuable time and money.

Typical gyroscopic inspection uses include:

- Inspect lines for cleanliness before returning to service
- Assist in identifying priority lines for cleaning
- Locate blockages or failures in pipe systems
- Remotely locate and remove foreign objects
  - Internal inspection of vessels without having personnel enter confined space.

**Multi-Task Industrial Ltd.** is proud to introduce **iFab Welding & Fabricating**. **iFab** has been providing cost effective pipe and structural steel fabrication, field construction and maintenance services to our valued clients for over a decade. **iFab** continues to evolve their quality workmanship, effective process and safety culture to meet the most current client expectations.

**iFab** believes in maintaining a strong sense of community and are committed to being involved with and supporting the communities where they operate. This includes hiring local residents, First Nations and subcontractors while adhering to the highest standards of safety, quality and service.

**iFab's** services include:

### Shop Fabrication:

From small bore to large diameter pipe, **iFab** is your dependable choice.

Services include:

- Carbon & Stainless Steel Piping
- Spools
- Skips
- Guides
- Tanks
- Steel Frame
- Steel Piping
- Control Modules
- Anchors
- Pipe Supports
- Tanks
- Falsework

### Facility Construction:

Complete Installation of all **iFab's** Fabricated Products as well as coordination of any additional Project Trade requirements. **iFab's** experience extends to Wellsites, Compressor Stations, Gas Plants, Oil Batteries, Pumpjacks, Upgraders, Refineries, Oil to Rail Terminals, Power Converter Stations along with many other areas of Industrial and Heavy Commercial activities.

### Renewable Energy:

**iFab** is dedicated to participating in a sustainable future and look forward to partnering on your Solar, Wind and Hydro projects.

**iFab's** professional teams shine when tasked with providing solutions in the challenging operations environment of today. It takes the right process, systems, tools and professionals to deliver results on time, based on very tightly defined schedules. **iFab** excels when it comes to cooperation on multi-contractor sites and are nimble enough to provide all necessary flexibility to ensure client expectations are achieved.
